### Steel Construction Sustainability Charter Declaration

The Company endorses the objective of the Steel Construction Sustainability Charter as follows:

1. To develop steel as a sustainable form of construction in terms of economic viability, social progress and environmental responsibility.
2. The Company will operate its business in an efficient and financially sustainable way in order to undertake contracts that satisfy its clients and add value for stakeholders.
3. The Company will work to optimise the impact of its manufacturing and construction activities on the eco-efficiency of steel construction through its life cycle.
4. The Company will work towards increasing the efficiency of use of resources and energy in steel construction by promoting the recovery, reuse and recycling of steel.
5. The Company will foster the health and safety of its employees and others in the steel construction industry, and will operate generally in a healthy, safe and environmentally sound manner.
6. The Company will demonstrate its social responsibility by promoting values and initiatives that show respect for people and communities associated with its business.
7. The Company will conduct its business with high ethical standards in its dealings with employees, clients, suppliers and the community.
8. The Company will build on its knowledge of sustainability and willingly share it with others. It will be open and active in its communications and it will help steel and construction companies and other organisations in the supply chain to implement sustainable policies.
